# Money Making NOVELTY NUT TREES

## AMERICAN HAZEL NUT

(*Corylus Americana*)—410—Easy to crack and shell. Excellent large sweet kernels are produced in abundance on low shrubby plants, never growing over 6 ft. tall. A fine ornamental shrub that yields when planted close in hedges, shrubs or borders, etc. Extra hardy, attractive and easy to grow. ONE plant often yields a peck of nuts. 2 yr. 1 to 1½ ft. tall 30¢ each; 3 for 70¢; 10 for \$1.95.

## LARGE FRUITING BLACK WALNUT

411—Springhill's large fruiting black walnuts are a select strain from Walnut Grove in Central Ohio. They are excellent lumber trees and yield an abundance of large meaty nuts. 1½ to 2 ft. size, 3 for 35¢; 10 for 89¢; 100 for \$5.95. 2 to 3 ft. size, 3 for 50¢; 10 for \$1.25; 100 for \$7.50.

## ENGLISH WALNUTS

(*Juglans Regia Sinensis*)—412—Springhill imported seed direct from Manchuria to raise this sturdy and hardy strain of English Walnuts. Fast growing with large meaty kernels with its shell easy to crack and remove the meats. Hardy where ever sweet cherry trees will grow, an excellent self-pollinating tree. 1 year size, 1½ ft. high, 75¢ each.

## HEART NUT

(*Juglans Cordiformis*)—413—Fascinating ornamental trees that bear in 3 years, heart shaped nuts in large grape-like clusters. Springhill recommends for those interested in the new and better trees. Heart Nut is noted for its superb flavored white meats that crack out in halves. The broad, tropical appearing trees are extremely hardy, fast growing and high yielding. A different and valuable tree. 1 to 1½ ft. size, 35¢ each; 3 for \$1.00; 12 for \$3.55.

## GRAFTED BLACK WALNUTS

THOMAS—419—Easy to crack and remove meats. New extra large grafted thin shelled, excellent cracking black walnut. We believe Thomas is the best of the grafted black walnuts for large, light colored, tasty meats. A fast growing tree that bears early and is valuable for lumber and nuts. We recommend grafted Thomas walnut as a most practical and beautiful shade tree that will reward you with an abundance of thin shell tasty walnuts. 3 ft. size, \$1.00 each; 3 for \$2.75. 4 ft. size, \$1.75 each.

## NEW MANCHURIAN CHESTNUT

(Blight Proof)—414—Enjoy finest chestnuts where Native American Chestnuts have blighted and died. Will bear second or third year after planting when 5 or 6 feet tall. We imported these hardy Manchurian Chestnuts (*Castana Mollissima*) direct from Manchuria. Springhill guarantees the trees a blight resistant strain. The nuts are 1 to 1½ inches across, comparing in size, quality and sweetness to the best native chestnuts. Only a few hundred plants available. Transplants, 1 to 1½ ft. tall, 45¢ each; 3 for \$1.20.

## MAMMOTH FRUITED HICKORY

415—Six years ago our men found an especially large rather thin shelled hickory, which we believe to be the finest value hickory we have ever seen. The 3 yr. seedlings Springhill offers are grown from this large variety; however, we cannot guarantee the seedlings will reproduce true from seed. 1 ft. size, 35¢ each; 3 for 90¢.

## CHINESE WALNUT

416—Has withstood 20 degrees below zero without injury; begins to bear when three years old. The nuts are larger and are borne in clusters of 10 to 20. They resemble English Walnuts in size, shape, and flavor. 2 ft. size, 40¢ each; 2 for 70¢; 2 to 3 ft. 75¢ each; 2 for \$1.40.

## AMERICAN BUTTERNUT

(*Juglans Cinerea*)—417—Often called White Walnut; prized for eating and valuable for timber and shade. The beautiful fast growing hardy tree is valuable for timber and shade. The nuts are shaped like a pecan and do not have to be hulled for winter storing. An exceptional value. 2 ft. plants, 35¢ each; 3 for 75¢; 10 for \$2.25.

## NEW HARDY PECAN

418—Hardy and sturdy as an Oak. A splendid and beautiful rapid growing shade tree that will reward you with bushels of fine quality nuts 2 to 2½ inches long. The kernels are plump and of finest quality. Guaranteed a true hardy strain with large paper shell nuts easy to crack. 1 to 1½ ft. 2 yr. trees, 50¢ each; 3 for \$1.35; 10 for \$3.95.

## STRIKING ORNAMENTAL JUNIPERS

Tall growing varieties of Junipers

### SILVER JUNIPER

(Juniper. Va. Glauca)—710—The favorite and best of all upright blue Junipers. A wonderful color for contrast in plantings. A vigorous semi-dwarf upright evergreen. Junior size 2½ ft. tall, \$3.50 each. Matched pair \$6.50. Transplanting grafts, 8 to 12 inch, 40¢ each; 2 for 75¢.

### JUNIPER CANNARTI

711—The best and most planted of all tall, dark green junipers. The favorite densely branched pyramidal evergreen is unsurpassed for beauty and dependability. 3 ft. plants, \$4.25 each; 2 for \$7.95. Transplanting grafts, 8 to 12 inch, 40¢ each; 2 for 75¢.

### JUNIPER ASHFORDI

712—We consider this one of the best of the formal evergreens. Narrow, compact, tall variety tapering into slim, spire-like beauties. A new, improved type of Irish Juniper. Striking foliage with bluish green color tints of pronounced beauty. 2½ ft. plants, \$2.50 each. Matched pair, \$4.65. Transplanting size 8 to 12 inch, 35¢ each; 5 for \$1.50.

Dwarf growing varieties of Junipers

### JUNIPER PFITZERIANA

714—Pfitzer is the most satisfactory and popular of all spreading Junipers in this country. Picturesque, arching branches. Handsome silver green foliage. Junior size 2 ft. spread, \$3.25. Matched pair \$5.95. Transplanting size 3 yr. 8 to 12 inch, 40¢ each; 2 for 75¢. Baby size 6 to 8 inch, 25¢ each; 5 for \$1.00.

### JUNIPER BLUE MEYERI

715—From China with a distinct Oriental charm comes this rare and unusually interesting little Juniper. The center of attraction with thick foliage of a turquoise blue with pink tints glistening in the sun as if dusted with silver. Junior landscaping size 18 inch, \$3.00 each. Matched pair \$4.65. Transplanting size grafts 8 to 10 inch, 40¢ each; 2 for 75¢.

### JUNIPER ANDORA

716—Best new, low spreading evergreen with unique color. Compact with green foliage changing to silvery-purple each fall. Junior landscape size 18 inch spread, \$2.25 each. Matched pair, \$3.95. Transplanting size 10 to 12 inch, 35¢ each; 3 for 90¢. Baby size 6 to 8 inch, 20¢ each; 6 for \$1.00.

## DIRECTIONS FOR PLANTING EVERGREENS

Evergreens have resins in their sap so. if they are permitted to dry or wither, there is little hope that they will live. Plant immediately. Dig large hole and fill two-thirds with rich top soil covering roots of plant. Then water until water fills hole. When the water has leached away fill remainder of hole and firm soil. Keep tops and soil well watered the first summer.

## BEAUTIFUL SINGING PINES

### SCOTCH PINE

717—Long, dark green needles on thickly set, graceful spreading branches. A lovely picturesque tree growing 100 feet high. Excellent pine for screen group and specimen planting. Junior size, 2½ ft. tall, \$1.65 each; 2 for \$2.90. 5 yr. transplanting size 1 ft., 30¢ each; 4 for \$1.00. Baby size 9 to 12 inch, 15¢ each; 5 for 60¢.

### MUGHO PINE

718—The best compact globe-shaped dwarf pine. Used extensively in group plantings, for its formal effects. It never grows over 3 to 4 ft. tall and may be kept smaller by shearing each spring. Compact, fully developed field grown, hand-trimmed plants. 18 inch broad and tall, \$3.65 each. Matched pair, \$6.95. Transplanting size 6 to 9 inch, 30¢ each; 4 for \$1.00. Baby size, 4 to 6 inch, 20¢ each; 6 for \$1.00.

### PLANTING SMALL EVERGREENS

Protect from drying; plant immediately watering well. The resins in evergreen sap cause permanent injury when plants are permitted to shrivel or dry. Thoroughly pulverise soil before setting plants. Examine body of plants near roots for soil marks which show depth plants were planted in nursery. Do not set more than 1 inch deeper than it was planted before. Place plant and fill hole half full with rich top soil and firm well to eliminate air pockets. Water well and fill remainder of hole with dry dirt. Water intermittently throughout the summer as weather conditions require. Do not use commercial fertilizer while planting evergreens.

## BROAD-LEAF EVERGREENS

The following shrubs hold their foliage all winter and are in great demand. Our most eminent landscape architects are recommending and specifying these varieties over our regular formal evergreens because of their informal graceful growth.

**EVERGREEN FIRETHORN** (Pyracantha)—9A10—Scarlet fruits from early fall until late winter. Glossy foliage. 8 to 10 inch transplanting size.

**EVERGREEN BITTERSWEET** (Euonymus Patens)—9A11—Dwarf upright evergreen shrub that is full of bright orange bittersweet-like fruits each autumn. 9 to 12 inch transplanting size.

**AMERICAN HOLLY** 9A12—Grow your own holly for Christmas decorations. It's hardy as far north as Toledo and Detroit. Plant three or more to be sure they will fruit. 4 yr. 8 to 12 inch plants.

**HOLLY LEAF MAHONIA** 9A13—Glistening green holly-like foliage accented with reddish-bronze. Clusters of attractive blue grape-like fruits. 8 to 10 inch transplanting size. Same price as above evergreens. Bushy 1 ft. B. & B., \$2.75 each.

## HISTORY OF OUR BUSINESS

**Peter Bohlender Stayed At Home While  
Gold Miners Rushed West  
To California.**

In 1849, the same year in which gold was discovered in California, Peter Bohlender started working in a nursery near Dayton, Ohio. His natural love of trees and plants, his intimate knowledge of their proper planting and care, led him to the nursery business. So with the smallest of shoestring beginnings he launched his career as a nurseryman.

The buildings were small and the market was restricted to fruit trees and a few ornamental shrubs. Slowly, but surely, business improved and the nursery expanded. People around the locality of the nursery found that they could depend on Peter Bohlender's selection of plants. These people told their friends and the fame of the little nursery spread.

Perhaps Peter Bohlender never realized it, but one of the main factors in his success is that he was never an "office nurseryman"... he worked side by side with his men, cultivating the soil, planting and transplanting. Literally and actually he knew the business from the ground up. Even today, his grandson-successors are to be seen working in the fields. Like Peter Bohlender, they know the conditions of the soil from Practical Experience. They know the best varieties of plantings for any given purpose. They know what, when, where and how to plant... and will tell you just how to go about improving your home both from the standpoint of beauty and investment.

For 93 years the Spring Hill Nurseries has been operated by the same family... from Peter Bohlender to son to grandsons. Under each generation the management has been of the productive rather than the executive type.

With the members of the family are a number of staunch and loyal workers who have served from a quarter to almost half century, each one generously giving valuable experience and advice.

Today, in 1942, the unbelievably small nursery has grown to gigantic proportions... the packing sheds alone now contain approximately 75,000 square feet, nearly 2 acres, of floor space! It's the largest of its kind in the country! From these packing sheds each year go millions of plants and trees to every state in the Union!

If your order is for one plant, or a car load, the stock is all taken under roof out of the wind and sun, so as to reach you in good growing condition.

We attribute our success and growth to our location in the heart of the fertile Miami River Valley of Central Ohio, where we have superlative conditions for the production of the finest plants. Because of our buildings and modern methods of operations Spring Hill is TODAY able to offer better plants, better service and better values for your money.

## With New Varieties of Apple

**DOUBLE RED DELICIOUS** 1510—It's properly named for color, wholesome, mellowness, flavor and aroma whether for cooking or eating. Our trees are an improved bright red strain descended from the original stock. You cannot buy better no matter how high the cost. Save at our moderate price for this great variety.

**DOUBLE RED WINESAP** (Turley)—1511—This fine double red winter variety bears young, is a vigorous grower and heavy yielder. The large, red apples are unsurpassed for quality, being a choice eating, table and excellent cooking variety. We consider Turley the best new all-around commercial and home variety.

**YELLOW DELICIOUS** 1512—Golden apples of the same shape, size, and quality of the standard Delicious but possibly it excels in bearing qualities and tastiness. For those who like golden apples, Yellow Delicious is champion.

**NEW LODI** 1513—A beautiful large golden apple. One of the first to bear, surpassing Yellow Transparent for cooking and eating. The fruit holds on the trees, not dropping.

**NEW RED HARALSON** 1514—A great achievement. This high quality winter apple keeps until spring and will thrive and bear where temperatures go to 40 below zero. A vigorous tree usually filled with apples the 3rd year. This variety improving and being planted in the great Northwest. Highly recommended.

Jonathan Apple

**FERTILIZING AND CULTURAL DIRECTIONS for Fruit Trees.** Keep earth cultivated around tree to keep down weeds and conserve moisture. It is advisable to water trees 1st year when dry. All fruit trees respond and benefit from the use of nitrogen, commercial fertilizers as Nitrate of Soda and organic fertilizers as well rotted manure or peat. Apply commercial fertilizers at top of soil away from trunk. Work organic fertilizers into the soil and mulch top of soil. It is not advisable to prune young trees very severe. We will be glad to give free pruning advice. Well cultivated and fertilized trees grow and yield much more satisfactorily.

**FAMOUS NEW DOLGA CRAB APPLE** FOR JELLY, PICKLES, BEAUTY, POLLINATION—1614—The best of all bearing 3rd year. Unusually beautiful fiery red fruit. Makes superb jelly and sells on sight. Semi-dwarf makes excellent ornamental tree. First time priced as low as other apple trees on this page. As low as 3 for 80¢. See prices listed below.

## HAVE SOME STRAWBERRIES!

fruit, adapting itself to practically all climates and soils.

Pleasant Memories! Most of us recall the delightful hours spent in a strawberry patch. The strawberry is our most cosmopolitan

**AMBROSIA** 1810—Ripens a month later than Premier. The newest and latest ripening high quality healthy strawberry. Ambrosia is self-pollenizing, extremely hardy, and tall, maturing its fruits off the ground. It commands premium prices because of the extra large sparkling bright red sweet fruits that mature when June varieties are gone.

**SENATOR DUNLAP** 1811—Has unusually long fruiting season. Bears immense quantities of large, rich, fine flavored berries, bright, rich red clear through. A dependable and favorite variety for canning.

**DORSETT** 1812—A new berry originated by the United States Department of Agriculture. Superior to Premier. A decided "money-maker" with large, scarlet-red berries of the finest quality, size, and flavor.

**FAIRFAX** 1813—Like Dorsett, it was introduced by the United States Department of Agriculture. Similar to the above but the berries are a darker red. Firm berry and good producer.

**NEW BLAKEMORE** 1814—Blakemore is the best early shipping variety ever grown in the south. Grows well as far north as Ohio Valley. U. S. Dept. of Agriculture, yellow free introduction of real merit. Extra productive with good quality and size of berries. Also a good plant maker.

**PREMIER** 1815—A champion for 24 years. Dependable extra early heavy yielding variety—a sure bearer—for this reason Premier is the most planted of all varieties. Berries are large, firm and of superb quality, considered for a decade the perfect strawberry.

**NEW MAJESTIC** 2nd Season offered—1816—According to our results and information Majestic is destined to be the leading commercial berry of the future. Plants very large with deep root systems and produce more runners than most varieties. The only seedling of Premier that surpasses it for commercial production. Majestic blooms later, has longer bearing season. Extra firm, large, uniform conical shaped fruits that ship well. Topped the Cincinnati market this year and a row 320 feet long produced 229 quarts compared to 78 quarts of Premier in same number of feet.

**NEW CATSKILL** 1817—The champion of its class; the best midseason, firm and attractive berry of all. Heaviest producer of all leading varieties. More big, bright red berries of excellent quality. Adapted from Canada, South to Missouri and North Carolina growing best throughout the Middle West.

## THE WONDER STRAWBERRY

Famous For Sweetness  
and Heavy Yields

**NEW EVERBEARING WAYZATA** 1911—Plant Wayzata for hill system culture 18 in. by 18 in. It makes but a few runners, growing in clumps. Wayzata is the largest, most uniform bright red with the finest mellow sweet flavor of all everbearing strawberries and outyields other everbearers 3 to 1. Will start bearing right after planting. The blooms should be clipped the first few weeks so as not to weaken the plants. Order today—pick delicious strawberries this summer and fall. Prices see page 18.

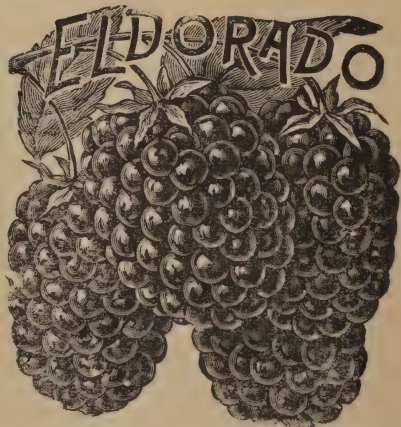

# SPECIAL PRICED SMALL FRUIT

**BLACKBERRY ELDORADO** 1912—The best commercial blackberry. After once fruiting, Eldorado berry growers discard other varieties. It is very hardy, claimed to have no equal in this respect. Fruit very large, jet black, good shipper, good quality, and a great producer. 1st size, No. 1, 12 for 65¢; 25 for \$1.15; 100 for \$3.25. Write for commercial 1000 lot prices.

Blackberry

**NEW ALFRED BLACKBERRY** (The blackberry without a core)—1913—Mammoth in size, often measuring three inches around and two inches long. New Alfred ripens early, about a week ahead of other kinds. It is noted for absence of seeds and core, also for its size and delicious, sweet flavor. 1st size No. 1, 12 for 75¢; 25 for \$1.35; 100 for \$3.75.

**GIANT BLUEBERRIES** 1914—New cultivated varieties famous for size, flavor, profit and beauty. Large clusters of pink buds which open into white bell-shaped flowers followed by the sapphire blueberries in June often large as grapes. Four plants in your yard will furnish you with blueberries for pies throughout the season. We offer Rubel and Jersey, the two leading varieties. Plant 2 or more plants for cross-pollination necessary for good yields. Acid peat to plant blueberries included with each order. 9 to 12 inch, branched 2 year, 2 for \$2.25; 10 for \$9.75. 15 to 18 inch, heavy clumps, 4 year, 2 for \$3.75; 10 for \$16.95.

**LUCRETIA DEWBERRIES** 1915—The first berry to ripen—ten days to two weeks ahead of blackberries. The large Lucretia Dewberries bring a big market price and are a source of real enjoyment in a home garden. Practically disease free and of easy culture. Unexcelled for eating and canning. ### CULTURAL ADVICE FOR MOST SUCCESSFUL RASPBERRY GROWING

Plant dependable, high yielding and disease resistant varieties listed on this page. Any plants that show signs of disease should be removed and burned. Plant early as possible in the spring. In order to promote strong, stocky plants pinch tops of new canes, when 18 inches tall, each summer, this makes more lateral branches resulting in heavier yields. Liberal quantities of manure and high nitrogen fertilizers are very beneficial. To maintain clean, thrifty plants and control anthracnose use 1 lb. dry lime and sulphur to 5 gallons of water and spray in early spring before foliage starts. Also advisable to dust foliage throughout summer with sulphur. Cultivate regularly throughout the summer checking growth in late August because of danger from winter injury.

**CUMBERLAND** 2015—The largest of all black caps; firm and a good shipper. One of the most profitable as a market berry.

**CHIEF** 2011—New variety. Ripens earlier than Latham, greater hardiness, more disease-resistant, bears more abundantly. Fruit very red.

**LATHAM** 2014—Latham is extra resistant to disease and insects. Vigorous grower that yields largest crops of mammoth sized berries. Famous for quality, bright red color and absence of seeds. Very hardy growing and producing in coldest parts of Northwest. The most popular and most planted of all Red Raspberries.

**BLACK BEAUTY** 2010—An excellent new luscious variety. Succeeds extra well and very disease-resistant. Popular with commercial growers.

**SODUS** 2016—New Purple raspberry. The heaviest yielding of all new raspberries and most promising of the better new raspberries. Large, firm and of excellent quality. Extremely healthy and hardy. A recommended variety.

**NEW LOGAN** 2017—By far the best early black cap. Large, glossy, high quality fruit.

**NEW RED GIANT EVERBEARER INDIAN SUMMER** The best Everbearing Red bears a full crop in June and an immense crop in the fall. A sensation because of its size, flavor, and unusual beauty. Wonderful keeping qualities. Berries are glossy red, conical in shape, and of extra large size. The greatest all-purpose Raspberry. The fall crops, when Raspberries are scarce and therefore highly prized, are heavier than the earlier ones. Price see below.

#### BEARING-AGE RASPBERRIES

### INSTRUCTIONS

#### PLANTING RASPBERRIES, BLACKBERRIES, DEWBERRIES, YOUNGBERRIES, BOYSENBERRIES

The above varieties resemble one another in general cultural needs.

**WHAT TO PLANT**—Strong plants of any variety in this catalog are good.

**WHERE**—Plant in almost any soil. However, berries grow best in rich soil.

**WHEN**—Plant in early spring or fall.

**HOW**—Work ground evenly and thoroughly. Make hole large enough to accommodate roots without cramping. Cover crown of plant 1 to 2 inches, being sure the roots are not turned up or crowded. Firm dirt around roots but keep surface of ground loose. In mid-summer after canes have grown, pinch top about two feet above ground to make branch. The second year after harvesting the crop, cut out all old canes. Repeat year after year. Cultivation and fertility are essential for good, thrifty, disease-free plants.

**PLANTING DISTANCE**—Raspberries and Blackberries 3 ft. by 6 ft.; Youngberries, Boysenberries and Dewberries 6 ft. by 6 ft.

# QUALITY GRASS SEED

*A Beautiful Lawn  
adds to the charm of  
your home*

IT PAYS TO BUY THE BEST FOR ECONOMY AND RESULTS  
Sow seed from early spring to late May when the ground is moist. A well prepared seed bed is essential, so work your soil thoroughly six to eight inches deep. Add humus to heavy soils. Good seed is important and economical. Sow 1 pound of seed to 200 square feet of lawn; if soil is dry after sowing be sure to sprinkle. Mow as soon as tall enough, as mowing makes the plants stool out. If soil is not the best, fertilize with turf builder and reseed any bare spots. Springhill's seed formulas are dependable and reliable. They are the results of many years research and are blended from the World's most choice grasses.

**KENTUCKY BLUE GRASS** 3510—Most dependable and cosmopolitan grass; growing well in most all locations and soils. Our blue grass seed is top quality, almost 100% free of weed seeds and high germinating, fresh crop seed. It pays to buy high grade seed for results. 1 lb., 38¢; 5 lb., \$1.75; 25 lb., \$8.25; 100 lb., \$32.00.

**SHADY LAWN** 3511—For places where the lawn gets less than six hours of sunlight. A splendid blend of shade-loving grasses which thrive with little sunlight and moisture. 1 lb., 65¢; 3 lbs., \$1.75; 10 lbs., \$5.65.

America's Best Hardy Hedge Plants see page 48

**SPRINGHILL'S FAMOUS EVERGREEN MIXTURE** 3512—Composed of the finest perennial grasses blended so they will grow quickly and make a sturdy sod in 2 to 4 weeks. The famous mixture is the result of years in testing all sorts of formulas. Springhill guarantees this mixture for those who want a sun and wear-resisting turf. Used extensively by Parks and Cemeteries. 1 lb., 45¢; 5 lbs., \$2.10; 25 lbs., \$9.75; 100 lbs., \$37.50.

## TO PLANT SHRUBS

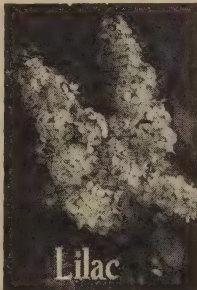

The diagram shows the proper depth to plant shrubs. Dig a large hole so the roots will not be cramped. Put the good finely pulverized top soil around the roots. Then water thoroughly and fill dry dirt at top of ground. A mulch of well rotted compost as manure, peat, etc., is excellent and helps the plants grow thrifty and produce more blooms.

## SCARLET FRUITED HOLLY SHRUB

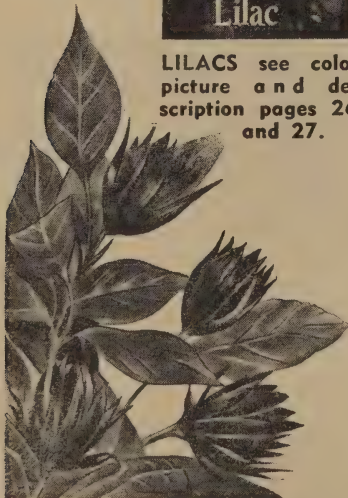

(Ilex Verticillata)

## DIRECTIONS FOR PLANTING AND GROWING ROSES

Follow simple directions in picture and you will succeed with our hardy roses and enjoy an abundance of bloom. A well drained soil is essential. With heavy soils adequate drainage should be provided. Plant below the bud or where branches start. This is usually about 2 inches deeper than they grow in the nursery row. After planting, mound up about 6 inches high around top of plant. Cut off top of rose bushes 1 or 2 inches above top of mound. Do not remove mound for at least ten days. Plant roses in beds 18 to 24 inches apart. Water well when planting. Fertilize with manure or any good commercial fertilizer about two weeks after roses have been planted.

### ROSA ROULETTI (Alpine Midget Rose)

5519—The smallest rose grown. The entire plant not over 10 inches high covered with fully double pink flowers. Strong plants, will bloom at once. 35¢ each; 3 for \$1.00; 10 for \$2.95.
